AI Workflow Redesign Worksheet

Redesign one workflow so that people and AI each do what they do best, with a human checkpoint where it matters.

How to use it. Pick one real workflow, not a tool. Map today, design tomorrow, test it on live work, then decide whether to keep, change or stop.

1. The workflow

The workflow we are redesigning
One name, one sentence

Why this one
Time lost, quality, risk or a team goal it serves

2. Today and tomorrow

STEP	WHO DOES IT TODAY	WHO DOES IT TOMORROW (PERSON, AI OR BOTH)	HUMAN CHECKPOINT	WHAT COULD GO WRONG

3. Measures

MEASURE	BEFORE	TARGET	HOW WE WILL KNOW

4. Test it on real work

- [ ] We ran it on live work, not a demo
- [ ] A person reviewed every AI output before it left the team
- [ ] We recorded what the AI got wrong

- [ ] We compared time and quality with the old way
- [ ] We wrote down what we would change

5. The decision

Keep, change or stop, and why

Use the measures, not the mood in the room
