Design Quality Assessment Worksheet

Assess the quality of one product, flow or release at a milestone, from evidence, in six areas.

How to use it. Use it at major design milestones, with the people who made the work. Score from what you can see and test, not from how it feels.

1. What we are assessing

The product, flow or release
One name

The milestone and date
Where in the work are we?

2. Score the six areas

Score from 1 to 5. Name the evidence beside each score, and one action where the score is below 4.

QUALITY AREA	SCORE (1 TO 5)	EVIDENCE	ACTION
Usability and task flow			
Accessibility			
Visual and interaction craft			
Content clarity			
Edge cases and error states			
Design-system use			

3. Reading it

What is strong
Say so, and say why

What must improve before the next milestone
No more than three things

4. Before we move on

- [ ] Scores rest on evidence, not opinion
- [ ] Accessibility findings have owners
- [ ] The people who made the work have seen the findings
- [ ] We agreed what happens next and by when
