WORKSHEET · LEADING DESIGN · ELEVATING DESIGN QUALITY

Experience Consistency and Harmonisation Audit

Find where products and journeys differ for no good reason, and decide what to fix first.

How to use it. Run it monthly or quarterly with the owners of each product. A difference is only a problem if it costs people effort or trust.

1. Scope

The products and journeys we compared
Choose a journey people really cross

The shared standard we compared against
Design system, guidelines, a reference product

2. Differences found

AREA	WHERE IT DIFFERS	PRODUCTS AFFECTED	EFFECT ON PEOPLE	FIX AND OWNER
Terminology				
Patterns and components				
Navigation and flow				
Error and empty states				
Visual language				

3. Priorities

Fix first, and why
The differences that cost people the most

Differences we accept on purpose
Where a product genuinely needs to be different

> If the same difference appears in five products, it is a gap in the shared standard, not five mistakes.
