Experiment-to-Scale Assessment

Decide whether an experiment should stop, continue, be incubated or scale into a product.

How to use it. Use it when an experiment ends. Score each area from 1 to 5, record the evidence and the risks, and end with a clear decision.

1. The experiment

The experiment and when it ended

2. Score

ASSESSMENT	SCORE (1 TO 5)	WHY
Customer desirability		
Business relevance		
Technical feasibility		
Experience differentiation		
Strategic alignment		
Scalability and reusability		

3. Evidence and next steps

What evidence supports the concept?

What risks remain?

What dependencies exist?

Which product team could adopt it?

What further investment is needed?

The recommended next step

4. The decision

- [ ] Stop
- [ ] Keep experimenting
- [ ] Incubate
- [ ] Scale
